

# Clear bills. Fair splits. Instant sharing.

Tip & Split helps you calculate tips, split restaurant bills, and share the final payment breakdown in seconds. This guide walks you through every feature of the app.

## Create

Enter the bill total, tip, and people count with a fast and clean flow.

## Split

Choose an equal split or assign individual amounts when each person ordered something different.

## Share

Send the final receipt through Mail, Messages, WhatsApp, or any share target.

---

## FAST BILL SPLITTING

# Split any bill in seconds

Tip & Split turns a restaurant check into a clean, shareable payment breakdown. Create a bill, review the receipt, choose an equal or individual split, and send the result instantly.

### RESTAURANT RECEIPT

11 Peter Luger Steak House New York, NY 10018

GROUP Family

Tip Guide: 15-25%

| Kate Bell    | US\$ 68,93 |
| Self Self    | US\$ 68,93 |

Thank you for using Tip & Split

## SECTION 1 OF 8

# 1. Create a new bill

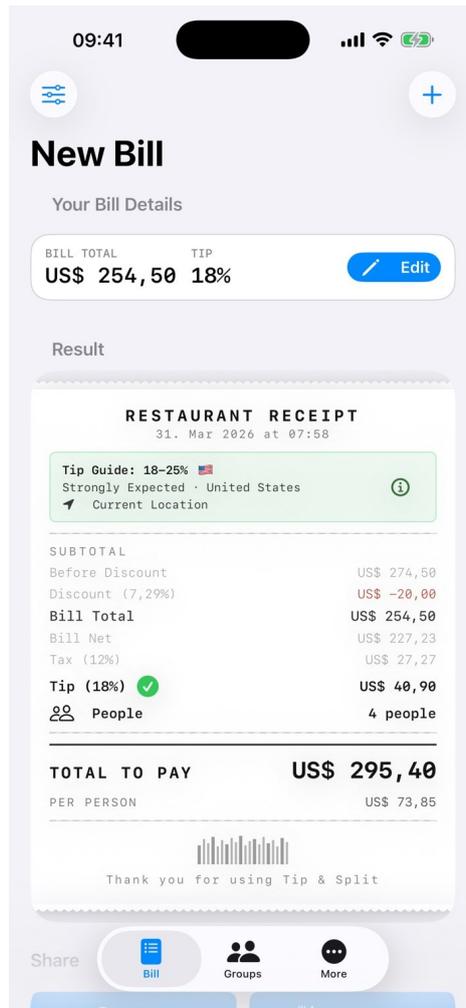

Start on the New Bill screen. Enter the bill total, choose the tip, and add the number of people. The app starts building the receipt immediately, so you always see where the final amount is going.

## SECTION 2 OF 8

# 2. Review the receipt

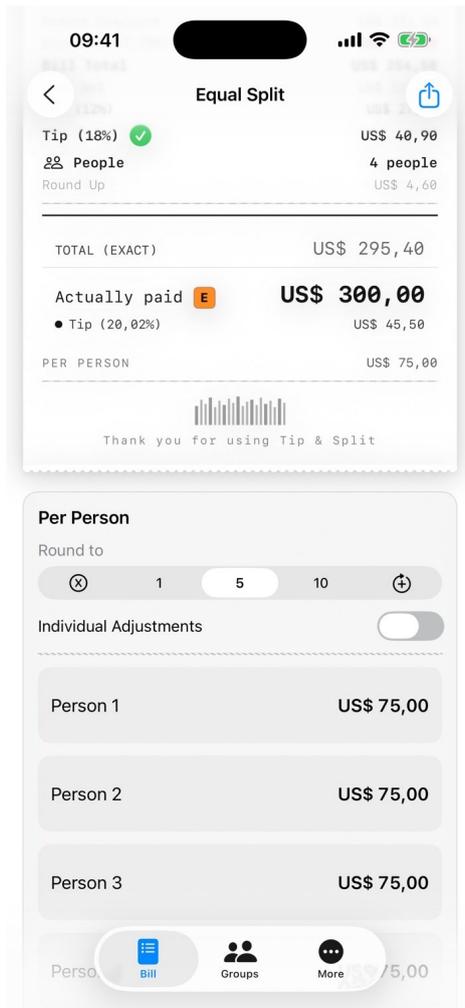

The result screen shows the full bill structure in one place: bill total, net amount, tax, tip, total to pay, and the per-person result. This receipt-style view is the core of the app and makes the split easy to understand for everyone.

### SECTION 3 OF 8

## 3. Use an equal split

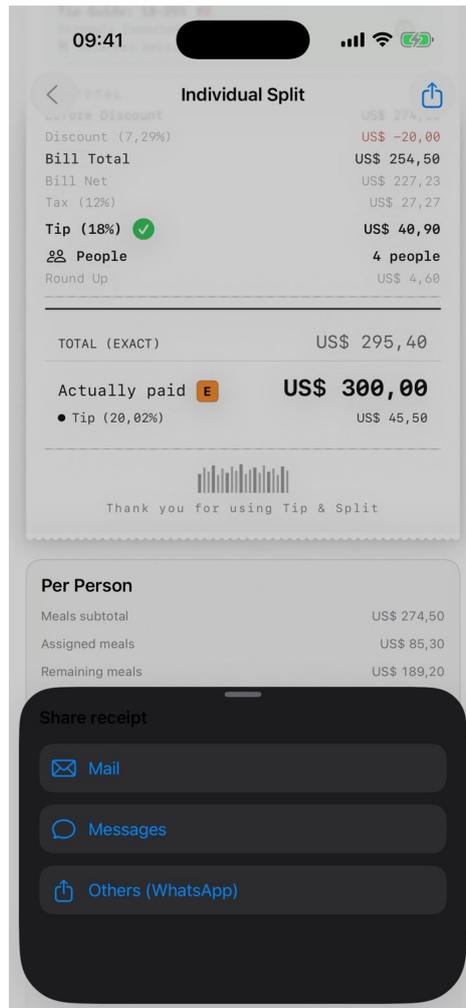

When everyone pays the same amount, open Equal Split. You can round the payment and compare the exact total with the amount actually paid. This is the fastest option for straightforward group bills.

## SECTION 4 OF 8

# 4. Use an individual split

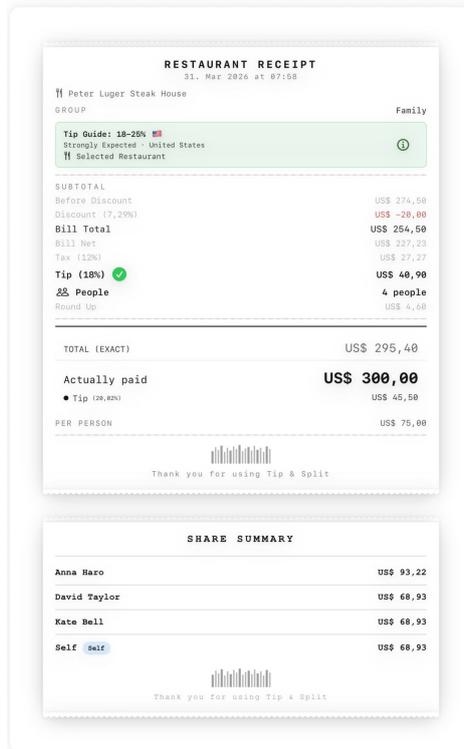

For mixed orders, open Individual Split. Assign meals or amounts per person and let the app recalculate each share automatically. This keeps uneven bills fair without manual math.

## SECTION 5 OF 8

# 5. Share the final breakdown

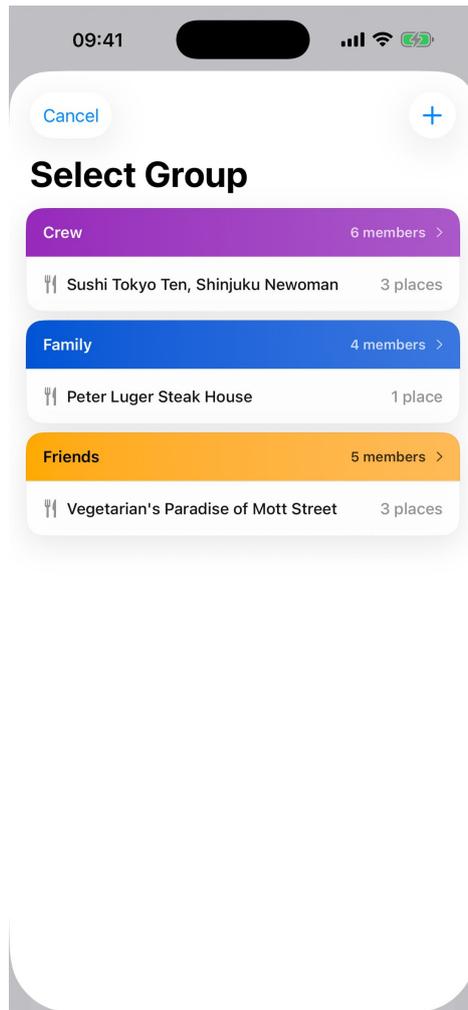

Once the split is ready, share the receipt and the payment summary. Each person can receive a clear amount with all relevant details, which makes settlement faster and avoids confusion.

SECTION 6 OF 8

## 6. Reuse saved groups

Saved groups help you avoid entering the same people again and again. Pick a group such as Family, Friends, or Crew and speed up bill creation for recurring dinners or travel.

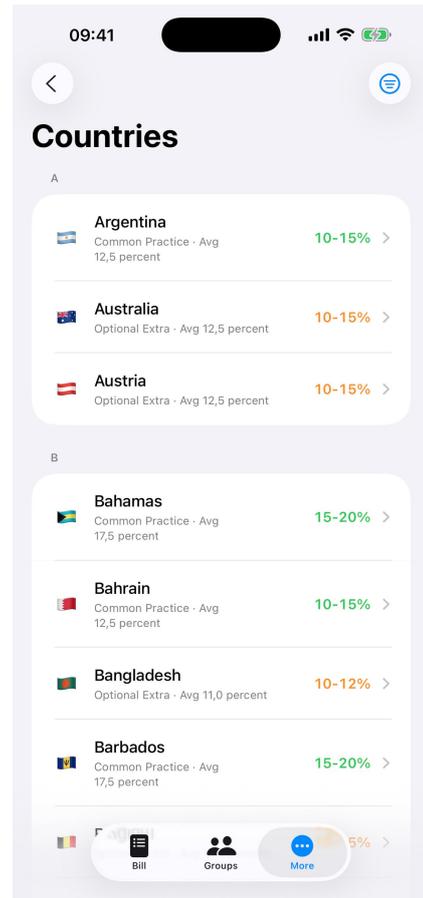

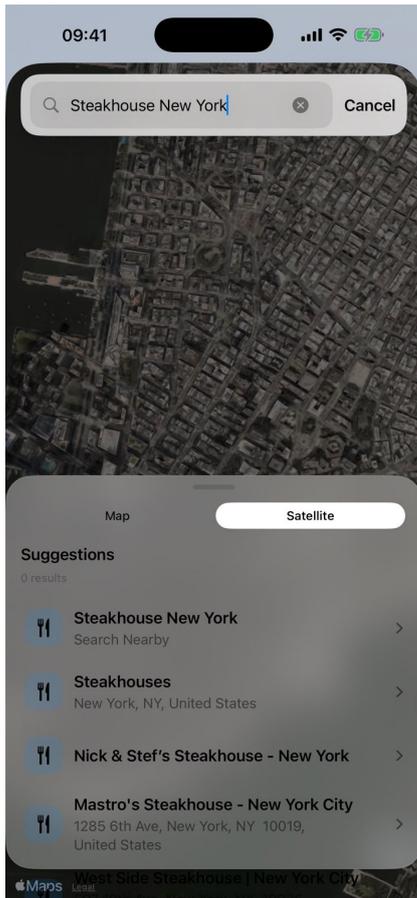

---

## SECTION 7 OF 8

# 7. Use restaurant and country guidance

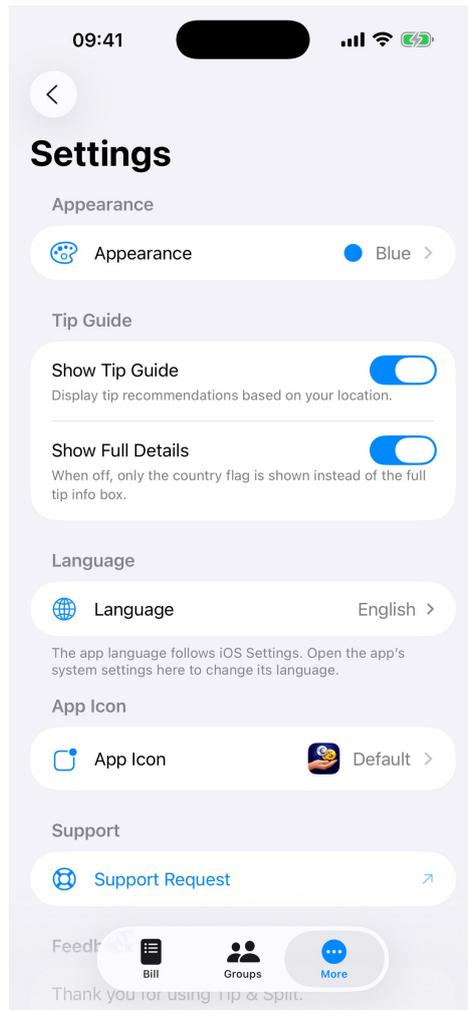

You can search for a restaurant, use local tip guidance, and check country-specific tipping expectations. This is especially useful when you travel and want the recommendation to match the local culture.

## SECTION 8 OF 8

# 8. Adjust the experience

In Settings, you can control the appearance, the tip guide, detail level, app language, and app icon. These options let you keep the interface as simple or as detailed as you want.
